

FROM JANUARY 01, 2022

PRICE LIST DESTRUCTORS OF THE «DM» SERIES

Name of the Destructor	DM-300	DM-500
Reactor capacity	0,3 m ³	0,5 m ³
Performance	up to 800 kg\day	up to 1200 kg\day
Overall dimensions of the assembly: - length, mm -width, mm -height, mm		
Weight of the module assembly	5800 kg	6100 kg
Voltage of the power supply network	380 V	380 V
Electricity consumption	650 W / h	650 W/h
Operating mode	around the clock	around the clock
Ash residue, no more than	6%	6%
Time to enter the operating mode	45 min	45 min
Service personnel	1 person	1 person
Permissible humidity of raw materials *	50 %	50 %
The size of the raw fraction	up to 120 mm	up to 120 mm
Exhaust gas temperature	265 °C	265 °C
Peak temperature of plasma chemical destruction	up to 2000 °C	up to 2000 °C
Processed raw materials	Carbon-containing waste	
Price without VAT	10 920 000 Р	13 440 000 Р

*With a further increase in humidity, the productivity of the installation decreases.
